MAKE YOUR WEATHER DECISION WHILE YOU STILL HAVE A CHOICE.

IT'S BETTER
TO ARRIVE LATE
IN THIS WORLD
THAN EARLY
IN THE NEXT.

- Be a shrewd pilot.

BEFORE TAKEOFF

- Get all available weather information.
- Be prepared for the worst and pre-plan alternatives.
- File a flight plan, notice or itinerary.
- Leave a margin for error or the unexpected – take ample fuel reserves.

WHILE AIRBORNE

- Keep an eye on the sky.
- Monitor weather broadcasts and ask for updates.
- Don't push your limits.
- Make your turnback/land decision early.
